In October this year. Polish exports amounted to EUR 23,126.8 million and was 5.5% higher than in October last year and at the same time 4.2% higher than in September this year.

Since May, exports have been systematically reducing the decline compared to 2019. In terms of the first ten months to the corresponding period of last year, exports were 1.9% lower (compared to -2.8% a month earlier).

The increasingly better export result in recent months is due to high foreign sales in the largest commodity section of Polish exports, machinery and mechanical and electrical devices (25% share in Poland's exports in 2019)

In September and October, exports in this section were higher by 13.9% and 12.8%, than in the corresponding months of the previous year.

In cumulative terms, the export of this section is already 0.7% higher than in the same period of 2019.

Although the agreement on the Brexit deal has not yet been voted by the British parliament nor the European Parliament, the very fact of its achievement is extremely important for Polish entrepreneurs.

The United Kingdom was the third most important recipient of goods from Poland in 2019 and, despite the specter of a no-deal Brexit, this situation continued in 2020.

Exports to Great Britain in January-October were 8% lower than in the corresponding period of the previous year.

Summary of 2019 in Polish foreign trade

PFR
Polski Fundusz Rozwoju

Summary of 2019 in Polish foreign trade

The year 2019 in terms of the development of Poland's foreign trade was once again a record high. According to the EU statistical office (Eurostat), exports of goods and services amounted to EUR 292,902.1 million and imports to EUR 268,038.0 million.

In 2019, foreign trade dynamics were lower than the year before, but still remained relatively high, all the more so given the weakening of our main trading partners. Exports of goods and services in 2019 increased by 6.5% (compared to 8.7% a year earlier), imports by 3.5% (10.4% in 2018).

The trade balance was positive for the seventh time in a row and amounted to EUR 24,864.1 million. The achievement of such a high positive difference between exports and imports was possible thanks to the turnover in services, and in particular the dynamic growth of foreign sales in services. The export of services increased by 8.6% to €64,058.6 million. Imports of services amounted to EUR 39,514.1 million, resulting in a positive balance of EUR 24,544.2 million. The trade in goods also recorded a positive balance of EUR 320.2 million

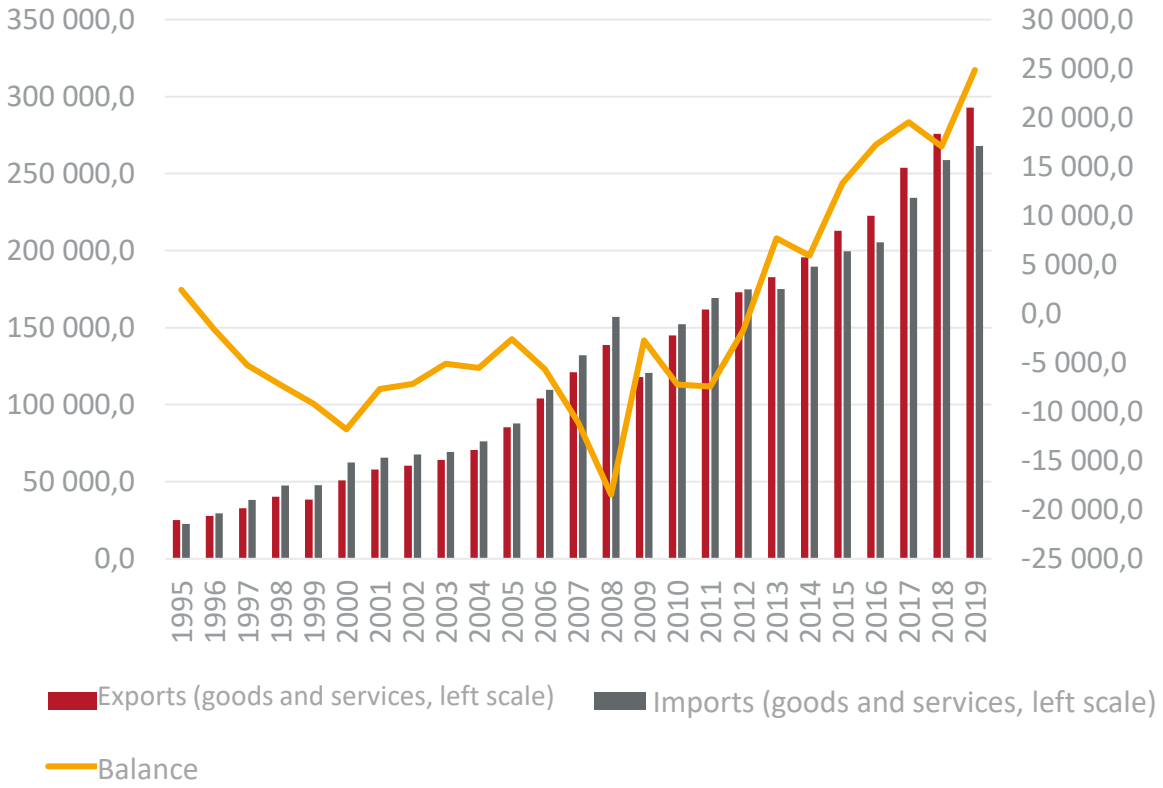

According to Eurostat data, exports of goods and services as % of GDP remained at the same level as in 2018, i.e. 55.6. Imports of goods and services as % of GDP decreased to 50.9 from 52.2 the year before.

Germany remained Poland's largest trading partner in 2018, with 27.6% of exports of goods and 22.7% of exports of services.

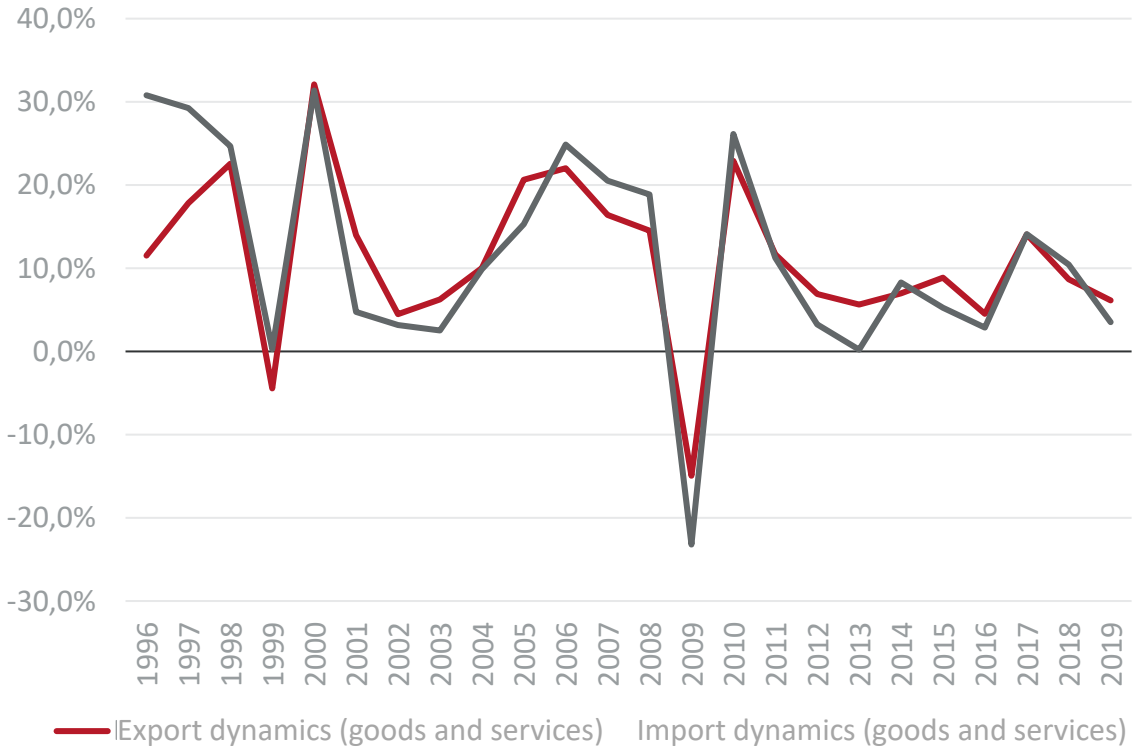

The volume and dynamics of Poland's foreign trade turnover between 1995 and 2019

The value of exports of goods and services amounted to EUR 292,902.1 million and imports to EUR 268,038.0 million. The trade balance was positive for the seventh time in a row and amounted to EUR 24,864.1 million.

The volume and dynamics of Poland's trade in goods between 1995 and 2019

Exports of goods increased by 5.5% to EUR 228,844 million at the end of the year. Imports, in turn, increased by 3.1% and amounted to 228,523.8. Thanks to the higher dynamics of exports, a positive balance of goods turnover was achieved, which amounted to EUR 320.2 million. Although the surplus is not large compared to the negative balance recorded in 2018. (-EUR 4,780.7 million), it is still satisfying.

Poland's imports in EUR million, by goods and services

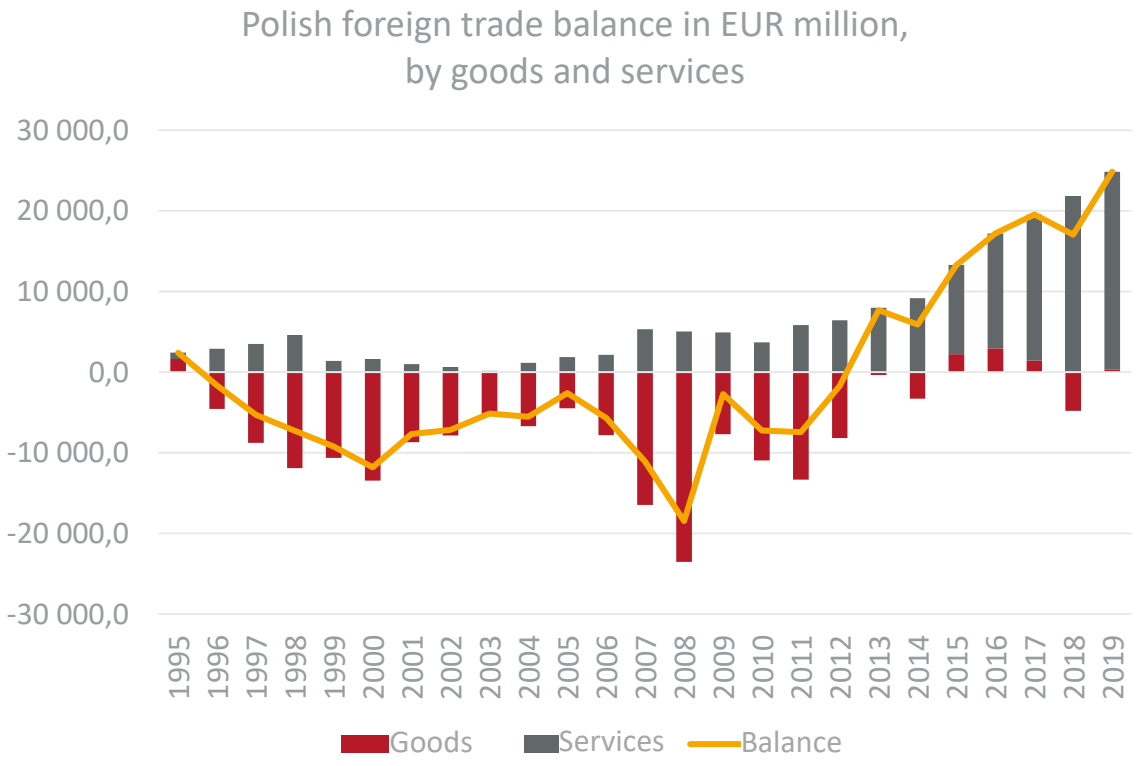

Source: Eurostat

Polish foreign trade balance by goods and services

Although services constitute a smaller part of Polish exports and imports, it is thanks to them that such a high positive balance of foreign trade was recorded last year. The share of services in exports has been growing steadily in recent years, from 18.5% in 2013 to 21.9% last year. The share of services in total imports is stable at around 14.5%.

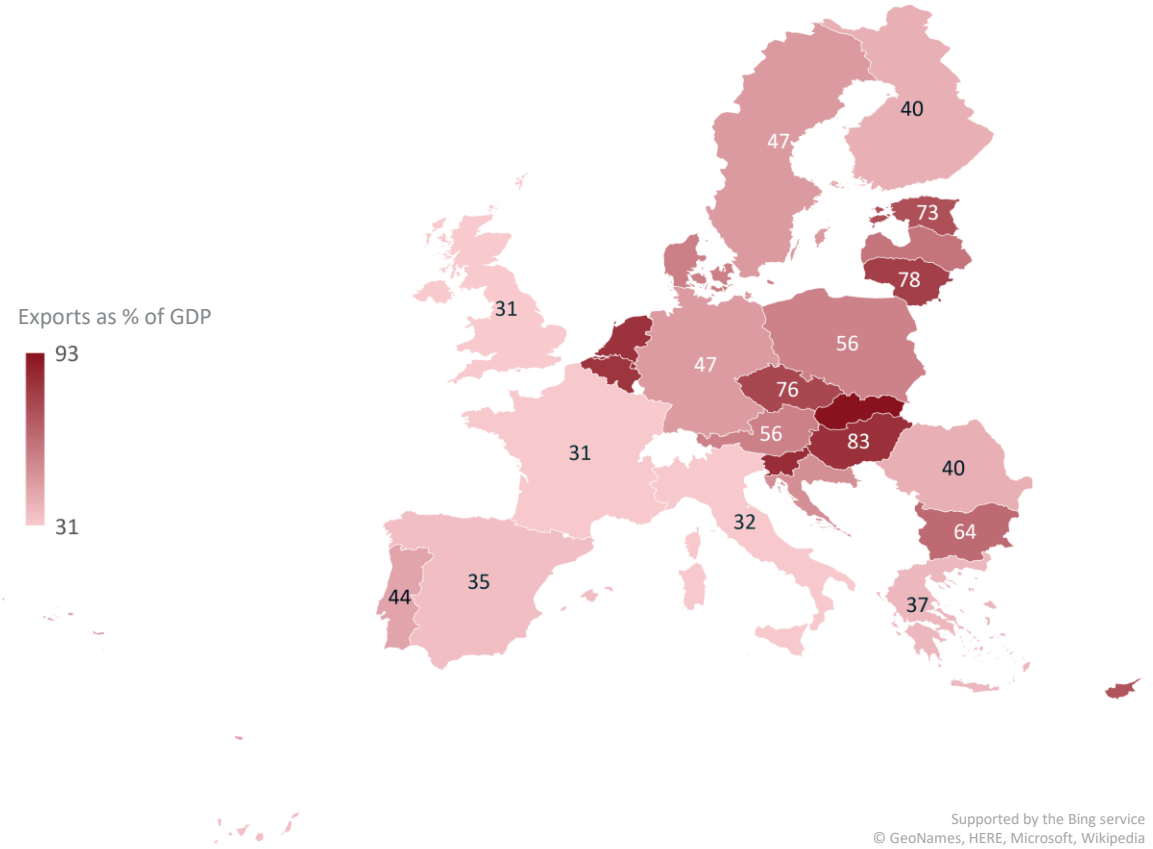

Source: Eurostat

Export of goods and services as % of GDP - Poland compared to the European Union in 2019.

Exports of goods and services constituted in 2019. 55.6% of Polish GDP. Compared to 1995, this ratio increased by 32.6 p.p. exports of goods accounted for 43.4% of GDP and services for 12.2%.

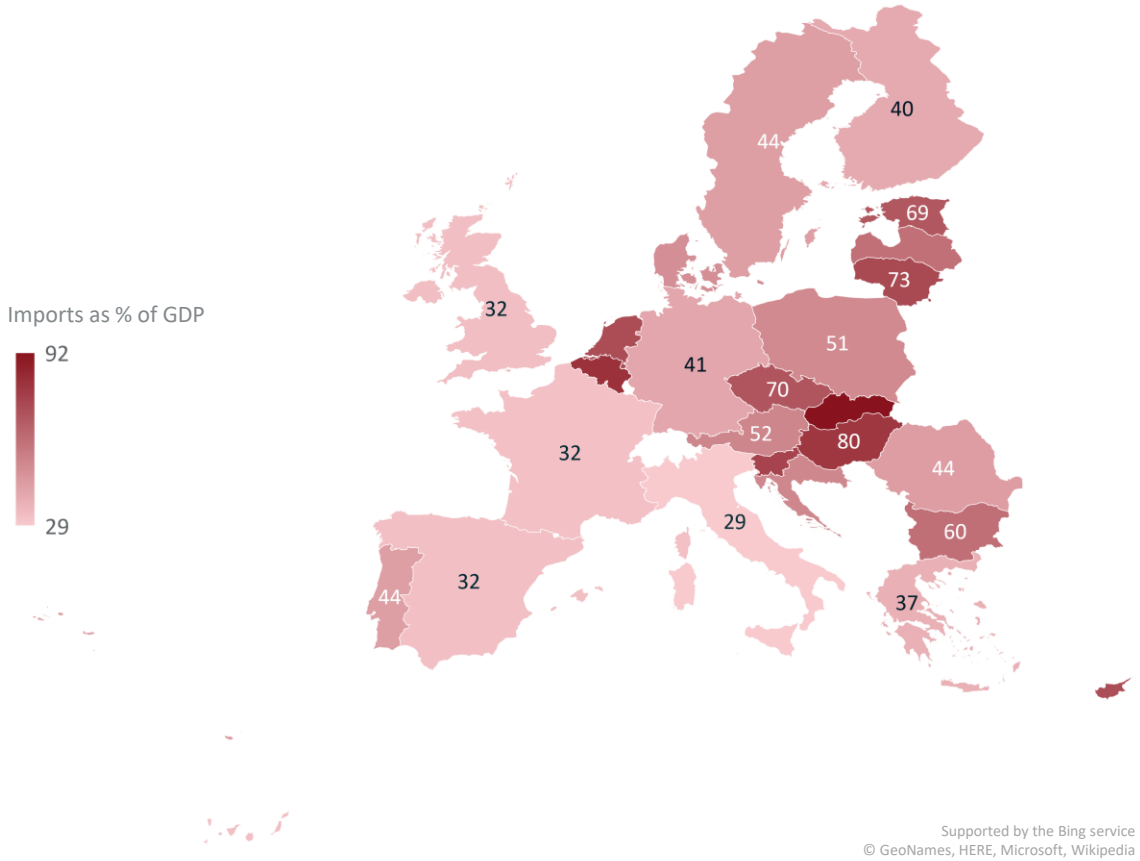

Source: Eurostat

Import of goods and services as % of GDP - Poland compared to the European Union in 2019.

Imports of goods and services constituted in 2019. 50.9% of Polish GDP. Compared to 1995, this ratio increased by 30.6 p.p.. Imports of goods accounted for 43.4% of GDP and services for 7.5%.

Poland's foreign trade turnover with European Union countries and selected non-EU countries

PFR
Polski Fundusz Rozwoju

Poland's foreign trade turnover with European Union countries and selected non-EU countries

PFR
Polski Fundusz Rozwoju

This chapter in the first part presents Poland's trade with individual EU countries since we joined the Community. The second part presents trade flows with selected non-EU countries.

European Union countries are the most important recipients of Polish goods and the largest suppliers of goods to Poland. Since joining the EU, Community countries have accounted for about 80% of our exports and about 60% of imports to Poland. In the top ten most important recipients of domestic goods in 2019, eight countries were members of the European Union - Germany was the main trading partner (27.6% share in total Polish exports), the Czech Republic came second (6.1% share), and the United Kingdom came third (6.0% share).

Compared to the year of joining the European Union, our exports to the Community increased by 290.2% and imports by 172.3%. Exports to EU countries grew on average by 9.9% per year, with an average annual import growth of 7.5%.

The situation is similar in services. The European Union is the recipient of about 70% of the services exported by Poland and the provider of almost 80% of services to Poland. As in the case of goods, the top ten most important recipients of our services were eight countries from the European Union. Compared to 2010. (since this year, the CSO shows in its database statistics on service turnover), exports of services to the EU increased by almost 138% and imports of services from the EU increased by 66%.

Turnover of goods by section and by product chapter - p. 234 - 452

PFR
Polski Fundusz Rozwoju

Turnover of goods by section and by product chapter

In this chapter we present the turnover of individual sections and commodity chapters in three aspects:

1) In terms of rolling annual sum and its annual dynamics. A rolling annual sum is nothing more than the size of a given variable (in our case exports and imports) for the last twelve months. The statistics presented in this way are cleared of supply shocks or one-off jumps, which makes it possible to present the situation in a given section much better.

2) exports of individual chapters and sections on a monthly (month after month) basis over the last three years - to show how exports grew or declined in individual months of each year.

3) List of the most important recipients and suppliers of goods from individual commodity chapters in 2019. (including annual dynamics and share in total exports of a given chapter).

Current assessment and forecast of future foreign orders - results of surveys of the economic situation of enterprises

PFR
Polski Fundusz Rozwoju

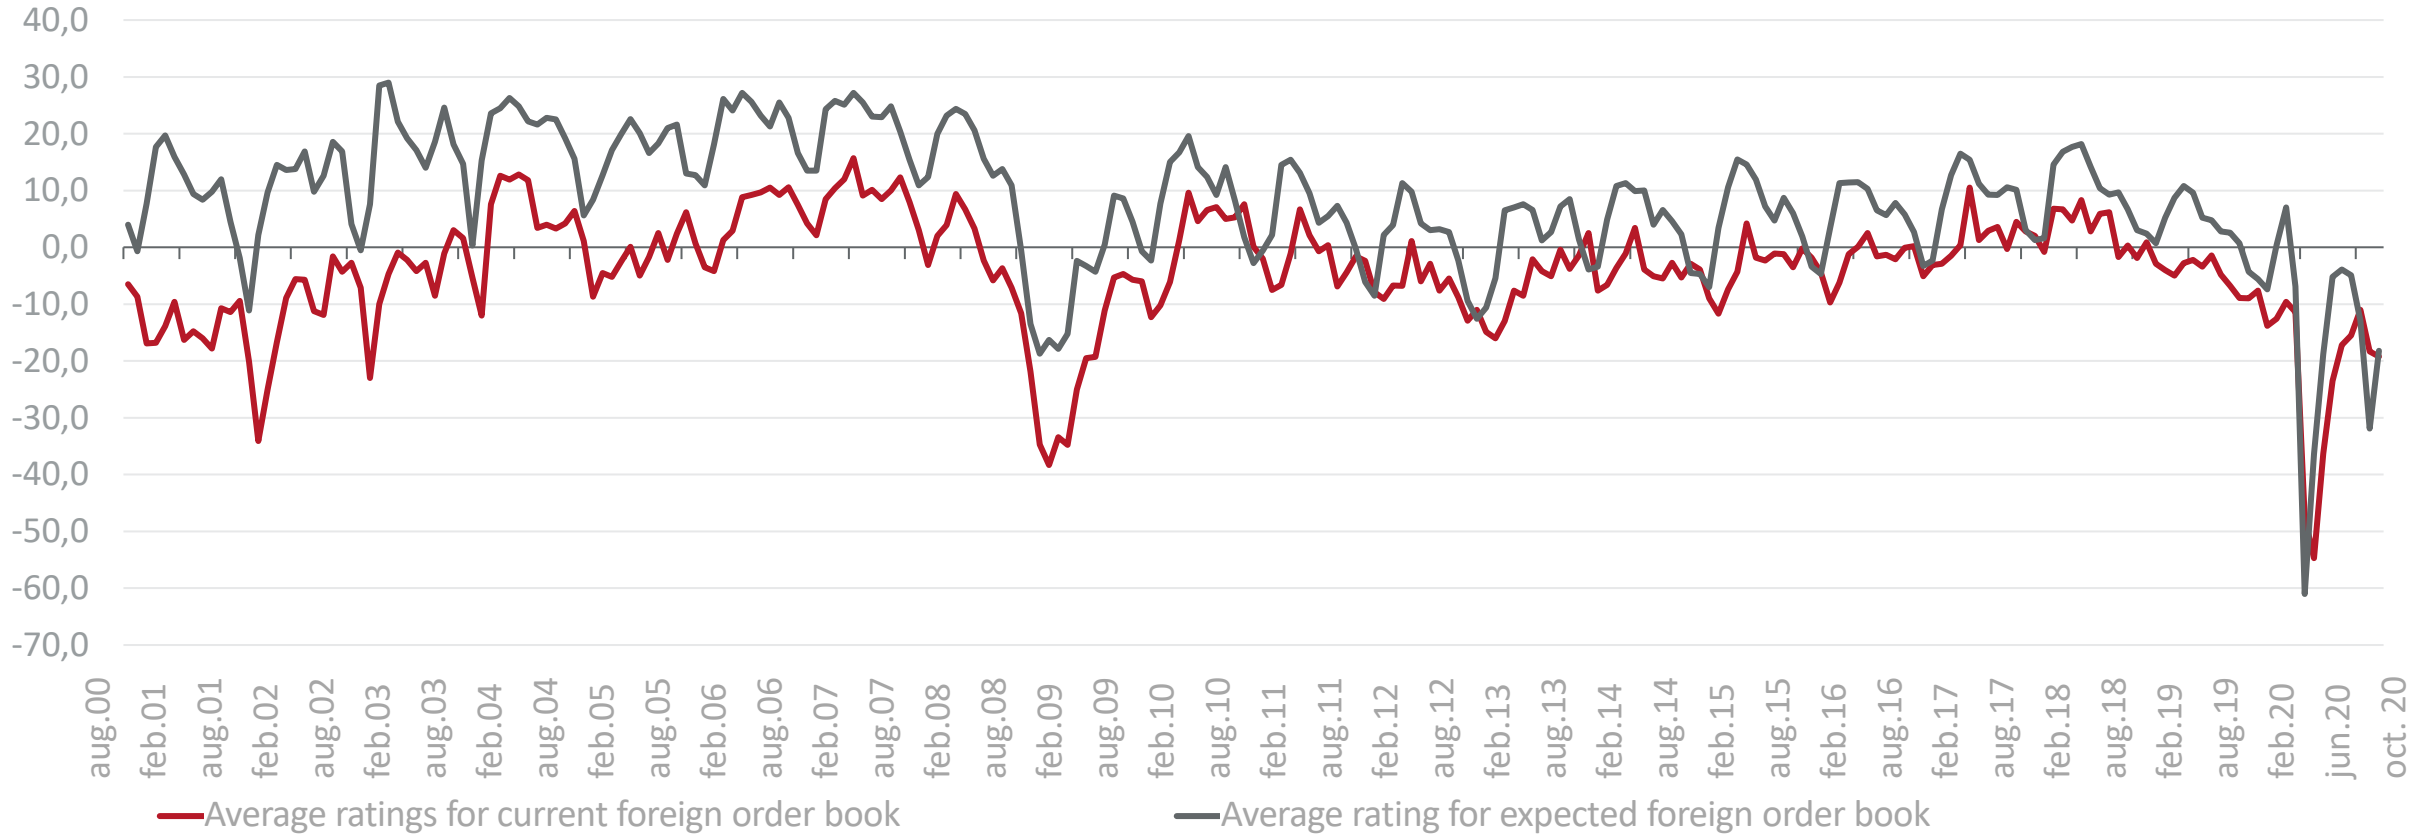

Companies evaluate the current and forecast future state of foreign orders

The last chapter presents how companies from a given industry look at the current and future status of orders.

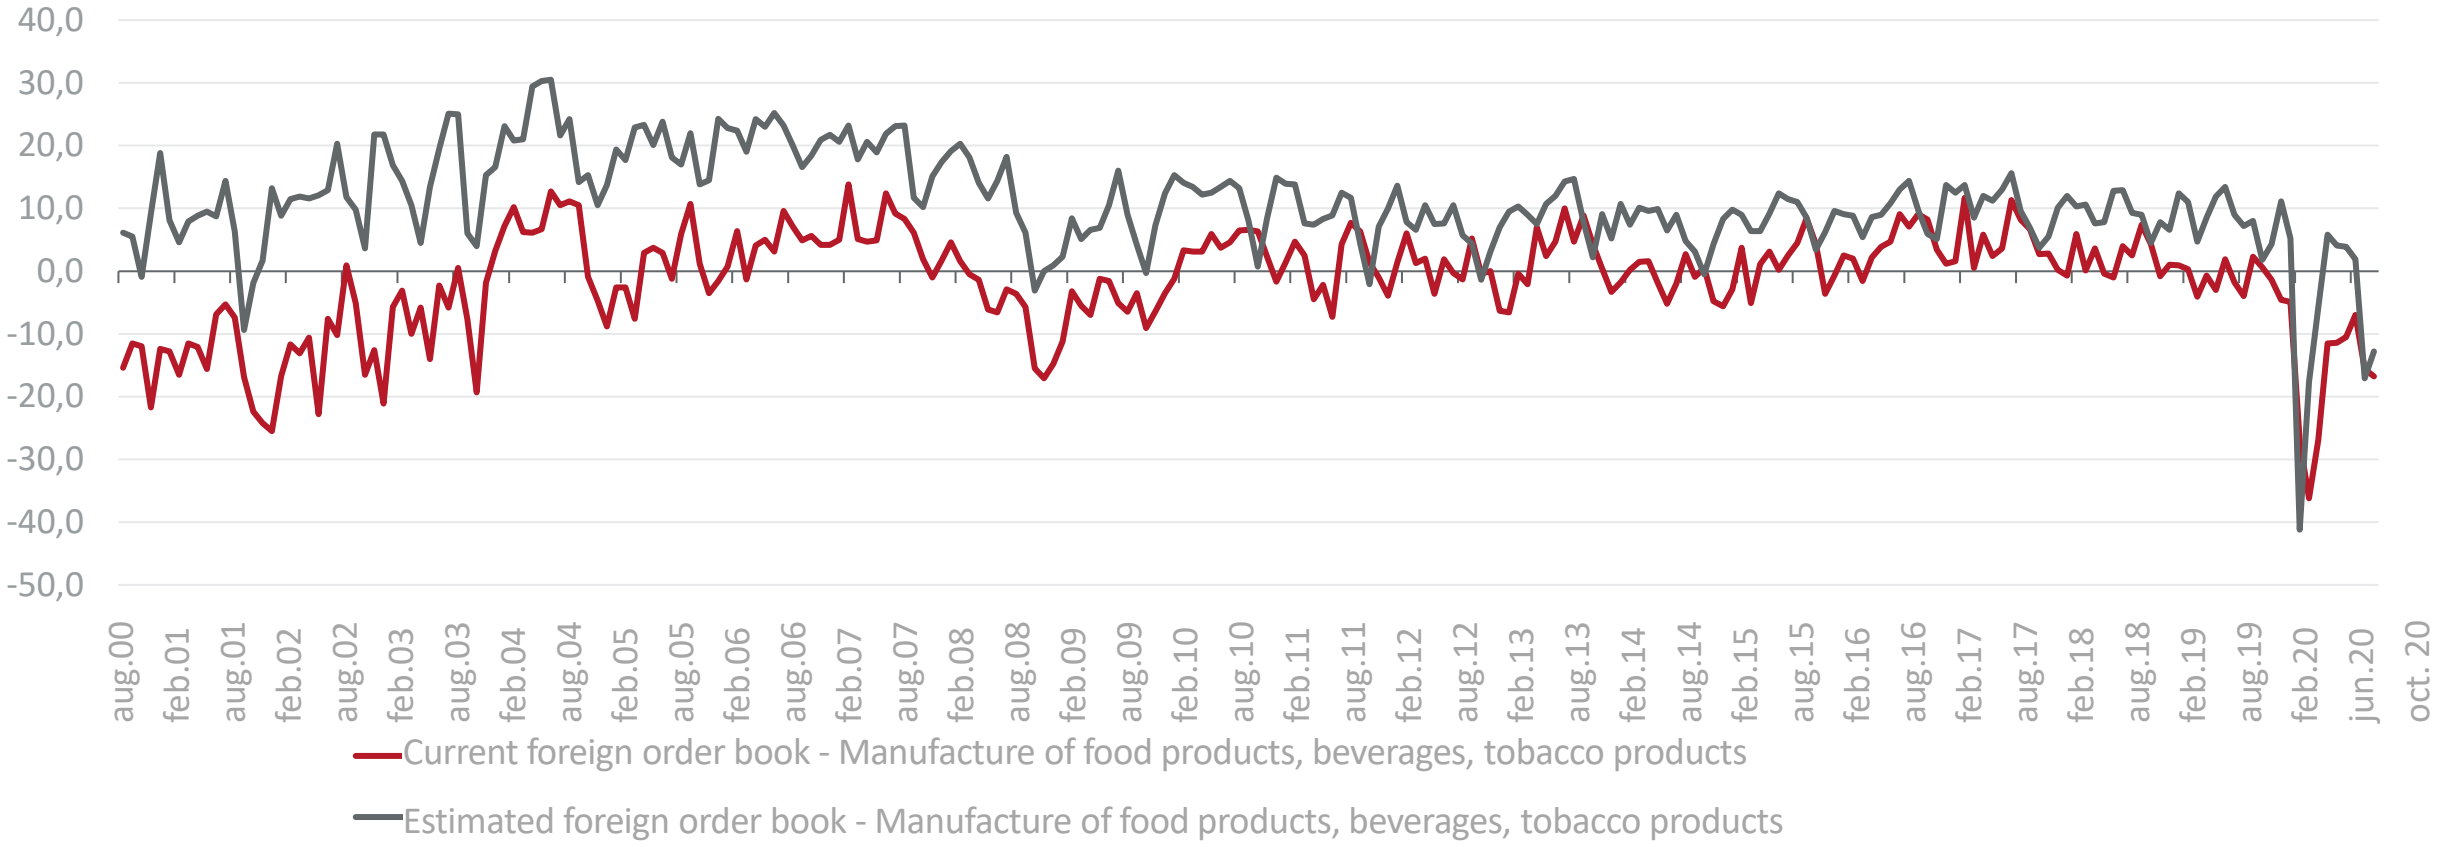

The indicator on the economic situation is the results of surveys conducted by the Central Statistical Office together with directors of selected enterprises representing specific industries. On the "market" these data do not evoke much emotion, but we are of the opinion that it is worth noting them as they shed light on the state of a given industry and its condition in the short term, and thus the condition of the whole export. The order status statistics assume a value between -100 and +100, where values above zero are considered positive (indicate good economic situation) and below zero - negative (bad economic situation).

PFR Group's offer for Polish entrepreneurs

PFR
Polski Fundusz Rozwoju

PFR
Polski Fundusz Rozwoju

For Polish entrepreneurs who plan to enter foreign markets with their products and services, assistance is provided by the Polish Investment and Trade Agency, among others through the network of Foreign Trade Offices (ZBH) - representative offices whose task is to support the export and investment of Polish enterprises in foreign markets, as well as to attract investors to Poland. The target is to create 70 offices, in countries with the greatest development potential for Polish companies.

PAiH also runs Industry Promotion Programmes, which enable entrepreneurs to expand into new, prospective markets outside the EU, often distant and expensive, which, due to the existing risks and costs, have not yet been taken into account by entrepreneurs in their export plans. When thinking about foreign expansion, it is also worthwhile to get acquainted with the offer of the export Credit Insurance Corporation (KUKE). The solutions offered by KUKE allow the exporter to effectively protect itself against the risk of not receiving payment for the goods delivered or service performed, and to obtain financing through factoring.
